Composition of Waste

The composition of waste materials has fundamental influence on environmental emissions associated with waste treatment, recycling and disposal, and may play an important role also for the Life Cycle Assessment (LCA) of waste management solutions.

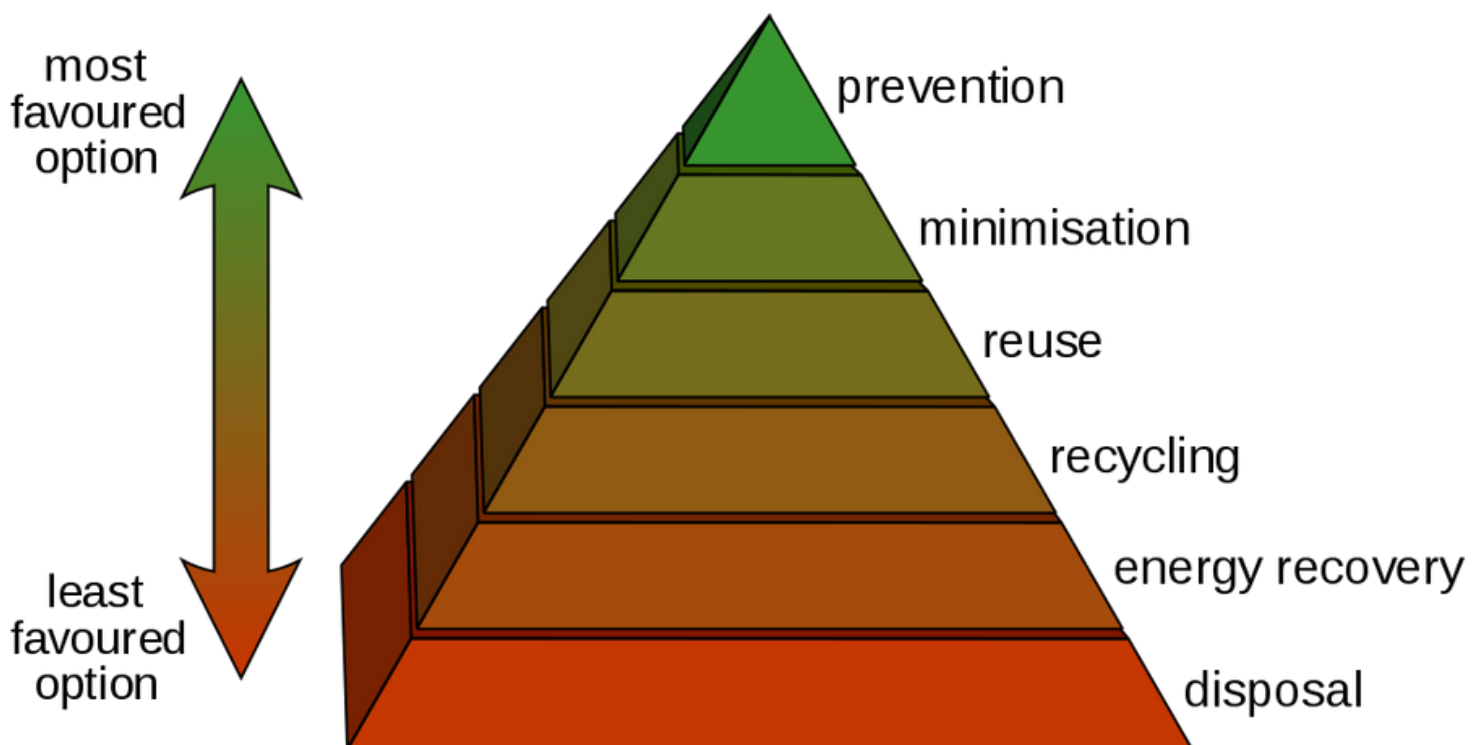

Solid Waste Generation in major cities of Pakistan (Recent Survey)

City	Population in million	Solid waste generation/day in tons
Karachi	20,500,000	16,500
Lahore	10,000,000	7,690
Faisalabad	7,500,000	5017
Rawalpindi	5,900,000	4,500
Hyderabad	5,500,000	3,973
Multan	5,200,000	3,680
Gujranwala	4,800,000	3,480
Sargodha	4,500,000	3,072
Peshawar	2,900,000	2,048
Quetta	600,000	716

Waste Management Hierarchy

The aim of the waste hierarchy is to extract the maximum practical benefits from products and to generate the minimum amount of waste. The proper application of the waste hierarchy can have several benefits. It can help prevent emissions of greenhouse gases, reduces pollutants, save energy, conserves resources, create jobs and stimulate the development of green technologies
